## RX580 Displayport funktioniert nicht

Beitrag von „al6042“ vom 1. Dezember 2019, 21:25

So sollte deine EFI-Partition auf dem Stick und auch auf deiner Festplatte aussehen:

The screenshot shows a file explorer window with a dark theme. The left pane shows a tree view of folders and files. The right pane shows a list of items with columns for 'Name' and 'Date Modified'. The 'EFI' folder is expanded, showing subfolders like 'CLOVER', 'EFI-alt', and 'BOOT'. The 'CLOVER' folder is also expanded, showing subfolders like 'tools', 'themes', 'ROM', 'OEM', 'misc', 'kexts', 'drivers', 'doc', and 'ACPI', as well as files 'config.plist' and 'CLOVERX64.efi'.

Name	Date Modified
EFI-alt	Today at 19:26
EFI	Today at 19:26
CLOVER	3. Sep 2019 at 14:48
tools	8. Nov 2019 at 21:25
themes	3. Sep 2019 at 14:41
ROM	3. Sep 2019 at 14:41
OEM	3. Sep 2019 at 14:32
misc	3. Sep 2019 at 14:41
kexts	21. Dec 2018 at 20:01
drivers	8. Nov 2019 at 21:26
doc	3. Sep 2019 at 14:41
ACPI	3. Sep 2019 at 14:41
config.plist	Today at 19:30
CLOVERX64.efi	26. Aug 2019 at 21:06
BOOT	3. Sep 2019 at 14:43

Im Ordner "EFI-alt" befindet sich die unveränderte Variante von Uni- oder Multi-Blubb..
