

Alienware m15 R1 - Dual GPU Gaming Notebook - lauffähige Konfiguration (EFI inside)

Beitrag von „dududududu“ vom 6. Dezember 2019, 02:46

Hi elmacci,

I have successfully installed Catalina using your EFI (both works but there is some problems).

1. The wifi doesn't work.

2. AlienFX lights always off

3.

- EFI v1: Trackpad doesn't work properly (can't force a left click with a touch, I must press the hard button on trackpad for a left click)

- EFI v2:

+ Trackpad doesn't work.

+ Can not shutdown or restart.

My wifi card is: Killer 1550 802.11ac 2x2 WiFi and Bluetooth 5.0

I really appreciate for your helping. Thanks you.
