

[Sammelthread] macOS Catalina 10.15 Dev-Beta Erfahrungen

Beitrag von „Altemirabelle“ vom 8. Dezember 2019, 11:46

Wenn du `nvrpm -p` eingibst siehst du:

EmuVariableUefiPresent No? (Auf blau markiert, bei mir Yes)

A screenshot of a macOS terminal window. The window title is 'marka — -bash — 80x24'. The terminal output shows the result of the command `nvrpm`. The line `EmuVariableUefiPresent Yes` is highlighted with a light blue background. Other visible lines include `bluetoothInternalContro`, `fmm-computer-name`, `security-mode none`, `SystemAudioVolumeDB`, `EFILoginHiDPI %00%00`, `SystemAudioVolume`, `bluetoothActiveControllerInfo %8f%82%ac%05%00`, `csr-active-config g%00%00%00`, and `flagstate %00%00%00%00%00%00%00%00%00%00%00`.
