Kein Catalina auf USB???

Beitrag von „ozw00d“ vom 19. Dezember 2019, 07:57

[ITzTravellnTime](#) of course, but i'd like to have my System clean. I think it's useful for beginners, not for me. Most things i do with my Hackintosh or on a real mac, i will do without having any apps installed, because these things are also possible with the tools which are already installed on the System.

Since i'm working with any kind of Computers, i love to go the hard way, because the easy way isn't a real challenge 😊

[karacho](#) hats ausprobiert fwruntime und quirks damit startet das system leider nicht.
