

Acer Swift 5 Mojave 10.14.5 Update Problem...

Beitrag von „larson“ vom 20. Dezember 2019, 12:49

Hi to all,

Sorry to use english, but i don't speak dutch ..

I have an Acer Swift 5 (SF515 51T 55ZM) on which i'm not able to launch mojave install, it's my second hackintosh, but this one get me crazy !

I post my EFI folder, with ACPI original, and with the error message.

Can you help me please ?

Configuration is

Intel Core i5 8265U 1.80 GHz

Intel Coffee Lake-U/Y PCH

8 Go, Intel(R) UHD Graphics 620, SSD Skhynix BC501 NVMe 256GB + SSD NVME 500 Go
Samsung Evo 960

Thanks !
