

Alienware m15 R1 - Dual GPU Gaming Notebook - lauffähige Konfiguration (EFI inside)

Beitrag von „zumotamokhimoru“ vom 5. Januar 2020, 09:07

Thanks for your configuration! On my alienware m15 osx works just fine! But there is one problem: when I connect the headphones to the built-in sound card, I hear wheezing, have you encountered this? I do not think very well in kexts, if you help, I will be very grateful!

Sond card: ALC 289
