

Alienware m15 R1 - Dual GPU Gaming Notebook - lauffähige Konfiguration (EFI inside)

Beitrag von „zumotamokhimoru“ vom 6. Januar 2020, 09:02

You are a genius! Thank you very much! I just copied kext and it worked without any patches.

If anyone needs it, here is my EFI bootloader.

I used the DWA-131 REV. E and Wi-Fi works great!

Now... this laptop is a very good hackintosh!
