

# acidanthera VirtualSMC (Wird zum Boot benötigt)

Beitrag von „Noir0SX“ vom 13. Januar 2020, 17:11

## v1.1.0

- Minor performance improvements
- Added OpenCore builtin protocol support (VirtualSmc.efi can still be used in other bootloaders)
- Added fan and voltage reporting in SMCSuperIO through I/O Registry (requires client updates) by [@joedmru](#)
