

# macOS auf meinem System [Achtung Noob!]

Beitrag von „kackpie“ vom 31. Januar 2020, 23:38

[AnonymCoder](#) Wenn ich den Hacken bei "FixLAN" setze, bekomme ich folgende Meldung:

```
Start DeskServices
End DeskServices
EFIBoot loaded from device: ACPI00002,0-PCI00000,0-ATA00000,0-ATA00000,0-ATA00000,0-ATA00000
EFIBoot
EFIBoot file path: \System/Library/CoreServices/EFIBoot.efi
Start EFIBoot
End EFIBoot
Start ProcessLine
End ProcessLine
RepairNetworkProtocol: failed, 0x00000000
RepairData protocol: protocol successfully.
Start DiskServices
End DiskServices
Start NetworkServices
End NetworkServices
Start CompressionCache
End CompressionCache
Start SystemManagement
End SystemManagement
Start SystemManagement
End SystemManagement
Start LoadMacOS
Start LoadMacOS
Error: attempting to set 0x00000000 at 0x0000000000000000 4100 type 0
End LoadMacOS
Warning: user cancelled format with status 0x0000000000000000
