Ozmosis mit macOS Catalina 10.15 - OZ167X-XMAX (extended)

Beitrag von „nrchandar0100“ vom 11. Februar 2020, 07:35

Hi,

Recently i updated my Catalina from 10.15.2 to 10.15.3 and after update it is not booting . The first apple logo progress bar works and after that i can see only dark screen. am i to update kernext patcher.plist if so where to download it i use ozmosis boot loader 167xmax

Thank you
