Catalina C621 Install

Beitrag von „mmo" vom 14. Februar 2020, 00:47

DSM2 iam looking for help installing osx cat. on a dominus with x3175, i would be happy to also pay for your support, i dont want to swap for a gigabyte c621, iam from Germany and due to the fact i know alot of important people in the hardware szene and do oc on ln2, i get the hardware mostly sponsored from Asus, i would teally appriciate your help, i know how to keep secrets due to nda iam signing very often, i wouldnt share with anyone. Thank you
