

Kext Updater Problem- und Ideenthread

Beitrag von „ozw00d“ vom 16. Februar 2020, 20:44

[Sascha 77](#) wo du recht hast. Hab nen NVRAM Reset gemacht. Danach csr-active-config in der config auf E7030000 gesetzt. Keine Ahnung warum vorher wars so:

Code

1. `csrutil status` ✓ 20:34:15
2. System Integrity Protection status: unknown (Custom Configuration).
- 3.
4. Configuration:
5. Apple Internal: enabled
6. Kext Signing: enabled
7. Filesystem Protections: enabled
8. Debugging Restrictions: enabled
9. DTrace Restrictions: disabled
10. NVRAM Protections: enabled
11. BaseSystem Verification: enabled
- 12.
13. This is an unsupported configuration, likely to break in the future and leave your machine in an unknown state.

Alles anzeigen

nach erneutem NVRAM Reset:

Code

1. `csrutil status` ✓ 20:41:40
2. System Integrity Protection status: unknown (Custom Configuration).
- 3.
4. Configuration:
5. Apple Internal: disabled
6. Kext Signing: disabled
7. Filesystem Protections: disabled
8. Debugging Restrictions: disabled
9. DTrace Restrictions: disabled
10. NVRAM Protections: disabled
11. BaseSystem Verification: disabled
- 12.

13. This is an unsupported configuration, likely to break in the future and leave your machine in an unknown state.
