Ozmosis mit macOS Catalina 10.15 - OZ167X-XMAX (extended)

Beitrag von „kuckkuck“ vom 18. Februar 2020, 10:08

I kindly asked you to post a picture of the problem you ran into so that I can patch KextInjection if necessary.

This Thread is not an OpenCore Thread and unfortunately I can't provide you with what you call "ready made OpenCore bootloader". If you want to use OC you will have to do research, read what it is about and how it works and try yourself.
