2 Probleme nach Upgrade auf Catalina

Beitrag von „nrchandar0100“ vom 20. Februar 2020, 14:37

Hi

I have already discussed my problem after updating mac os 10.15.3 it is not booting the progress bar runs and after that the screen is blank and dark. i use Ozmosis bootloader 167 x max. today i tried and installed catalina 10.15.0 and again it is not booting in Ozmosis. I tried shell 64 and placed boot 0 fix even after that it is not booting.

Regards
