In Arbeit ASRock Z87 Pro4 mit OpenCore Bootloader

Beitrag von „11101001" vom 27. Februar 2020, 06:27

Excuse me, my pc is very similar to yours. Previously, I try used Clover to boot the system(10.14 Mojave). I fix the sound and display problems, but I can't fix hibernation and shutdown problems. I found your OC EFI in this forum at yesterday. Download and try use OC Booting the system, use this EFI,fix the problem of hibernation and shutdown, but,my graphics card is an integrated graphics card (HD4400) , I try to fix this problem, I use opencore configurator to modify config.plist, it will cause the system to crash every time , so I would like to ask for help and make me an EFI (using HD4400 graphics card) .

motherboard:asrock z87 pro4 (BIOS ver:2.5)

cpu: intel i3 4170

ram:kington DDR3 1600*4

ssd :samsung sm961 256G (use M.2 to PCIE)

system: Mojave 10.14
