Hi .after one years i come bak for more fixing mac os on gl553vd . I need your help .

can you mix two id setting in applealc ?

id 15 microphone work very good. I test it . (internal mic and headphone mic)

id 22 speaker work very good (headphone and internal speakers)

mix id 15 and 22 for update id 16 .

{

Layout 22 ALC235 for Asus ROG GL553VD-FY380 (#448)

add some Chinese translate,and support FX53VD ALC235 with ID : 15 (#362)

}

and last day when i open the laptop I tooke this photo:
