Erledigt **ozmosis black screen Z77-D3H**

Beitrag von „supergg12" vom 11. März 2020, 09:47

Good morning all,

I would need your assistance.

I tried several times since Mojave 10.14.3 first to update to 10.14.4 and higher but without success since each time when loading I end up with a black screen.

Believing that the problem was with my Nvidia video card, I thought I would replace it with an AMD Sapphire RX580 Nitro +.

I tried all day yesterday to update Mojave 10.14.3 to Catalina 10.15.3 also without success with the same result as before.

Can you help me solve my problems, taking into account that I am using your Mojave rom for my Z77-D3H rev.1.0 motherboard?

Would it be possible to create a rom to install Catalina?

Thank you in advance.

Sincerely to the whole team.
