Ozmosis mit macOS Catalina 10.15 - OZ167X-XMAX (extended)

Beitrag von „supergg12“ vom 18. März 2020, 09:43

Hi,

Thank you for your answer.

However I do not have in the bios parameter "serial port" to set to disable. Refer to the two attached images.

As for your system startup problems, I'm afraid I can't help you being a hackintosh newbie.

I thank in advance the forum for helping me to solve my problem. 🙏🏻
