

X299 Tutorial - ASUS WS X299 SAGE/10G (Hilfe und Diskussionen)

Beitrag von „insomnia“ vom 20. März 2020, 16:26

Hi @[DSM2](#)

Thanks a lot for your fantastic tutorial step by step. I finally managed to install my Catalina using your guidance.

Here is my config:

CPU: i9 9980XE

MB: WS-X299-SAGE (base, not 10G)

GPU: Vega 64 (Sapphire)

RAM: Corsair CMW128GX4M8C3200C16 RGB Pro 128GB (8 x 16GB) DDR4 3200 MHz C16 XMP

TB: GC-TITAN RIDGE

NVME: 2X 500GB Evo 970 (1x for win 10, 1X for mac)

1x Blackmagic Mini 4k (HD &SDI)

4x 3TB HGTS + External OWC 5 Bay Thunderbolt 3 (5X 6TB Ultrastar - 32TB)

1x Solarflare SFN5122F Dual-Port 10GbE SFP+

2x 27 Inch Apple Cinema Displays (mini display adapted to DP)

Bios V1201

I have purchased recently a 5700XT and I used the agdpmod=pikera and no joy there, please find attached where it gets stuck.

Looking forward to your response. Many thanks!
