Erledigt [Need Help] H87 Clover "End RundomSeed" +++ and reboot

Beitrag von „June" vom 20. März 2020, 20:18

[Raptortosh](#) I don't know why it doesn't work: when it's booting, the theme or kernel of the ozmosis can not be loaded, but is too late now for me now, I have to go sleep, I will try again tomorrow

Today I make a new one with the ffs files decompressed from you made for me tomorrow, I can't see the theme of ozmosis wihch I insterted in, and when I select "High Sierra install" from UEFI, the screen show me "No way sign".

I remember that last time I saw the Ozmosis' theme I used 167X MAX, download from [this thread](#) just ozmosis\EnhanceFat\APFS\HFS+\Default\FakeSMC, without DarBoot\kernextPatch
