[Need Help] H87 Clover "End RundomSeed" +++ and reboot

Beitrag von „Raptortosh“ vom 25. März 2020, 07:36

You should delete the Clover Folders on the ESP. In your Rom there is only VirtualSMC but that should be enough.

I don't know if Ozmosis supports your CPU and your GPU because this is a Notebook GPU.

Edit: It should be supported.

Code

1. Intel Iris(TM) Pro Graphics 5200 DisableIntelInjection
