Erledigt [Need Help] H87 Clover "End RandomSeed" +++ and reboot

Beitrag von „June" vom 25. März 2020, 08:42

If not injected, it will run normally with a native environment? I delete the Clover floder, but the /EFI/boot/bootx64.efi looks like a part of Clover, and when I select booting from "Install Mac OS High Sierra" item, the screen just show me a apple logo, then it will be reboot
