Ozmosis mit macOS Catalina 10.15 - OZ167X-XMAX (extended)

Beitrag von „nrchandar0100“ vom 30. März 2020, 15:33

Hi

I replaced the new kernext patcher.ffs in rom and plased kernextpatcher.plist in OZ still i could not boot Catalina. it strucks after loading the first prograssive bar then i could see only whit screen with the mouse pointer on the left upper corner.

Please help me to solve it

Regards
