

X299 Tutorial - ASUS WS X299 SAGE/10G (Hilfe und Diskussionen)

Beitrag von „insomnia“ vom 31. März 2020, 21:09

[EFI.zip](#)Ow hi @ DSM2! I was just wondering if you could help with my post above, # 163 . I can't fix that problem with 5700XT.

I tried the the agdpmmod = Pikera and and had no lock.

My monitors are going black before the log in. The only way I can get it to work is through HDMI. I also noticed the other way around to work but there are other problems, lags etc is if I change my smbios to MacPro 7.1 so that's not a good option either.

Any advice?

Thanks!
