

OpenCore Sammelthread (Hilfe und Diskussion)

Beitrag von „luxus“ vom 10. April 2020, 11:18

[Raptortosh](#)

Google hat das gefunden

"This is due to OpenCore getting confused when trying to boot boot Windows and acidentally thinking it's booting OpenCore. This can be avoided by either adding a custom drive path under entires and have Windows with it's bootloader renamed *or* move Windows to it's own drive"
