

**Erledigt**

## **Clover 5109 mit dunkel blauen Hintergrund**

**Beitrag von „blaze1984“ vom 10. April 2020, 23:04**

Wollte auch Grade sagen benutze dazu den clover Theme Manager Download findet man über Google.

Clover Theme Manager

LAST BOOT ▾ | Legacy Clover 4750 loaded **Template** as set in /Volumes/BootVolume/EFI/CLOVER/config.plist on device disk0s2

BOOT DEVICE | /Volumes/BootVolume/EFI/Clove ▾   Free Space: **520MB** Installed Themes: **28/148** ?

-

*Badruzeus*

Launch daemon & rc scripts appear to be working. NVRAM changes will be saved (to nvram.plist)

Set which theme to use next boot. (Note: Any NVRAM entry will take precedence over config.plist)

NVRAM: using file nvram.plist Selected Theme:

CONFIG: /Volumes/BootVolume/EFI/CLOVER/config.plist Selected Theme:

PREDICTION: Theme to be used for next boot from device disk0s2 Entry: **DarkBootX**
