

Er will einfach nicht...

Beitrag von „McDaBaron“ vom 15. April 2020, 09:55

Moin,

ich habe es dann doch geschafft OpenCore von Anfang bis "?Ende?" zu konfigurieren. Nachdem ich den Vanilla Guide dann noch 3x gelesen habe, hab ich meinen Fehler auch gefunden. Also Catalina läuft in der Version 10.15.4 soweit so gut. Nun hänge ich wieder beim Sound. Sobald ich AppleALC.kext aktiviere und VoodooHDA deaktiviere startet der Rechner nicht mehr. Die neueste Version von AppleALC hab ich mir hier im Forum runtergeladen.

Hier das Log vom Start mit AppleALC:

Code
