

# Install Catalina on Lenovo Ideapad s145 i7-1065G7

Beitrag von „TUNIN96“ vom 16. April 2020, 15:27

Hello guys, I would like to install Catalina on my laptop. I tried with clover in uefi mode and I had this error([Pic](#)). Now I'm trying with opencore, bit without results.

I'm following this guide: [Guide](#).

But my ssdts file names are different from those in the guide. Could you help me, please?  
Thanks.
