## Newbie braucht allgemeine Infos/Hilfe

Beitrag von „rudi\_ment“ vom 18. April 2020, 17:39

Hallo nochmal, weiß nicht ob hier noch jemand reinschaut. Verzweifele so langsam wirklich. Also das System läuft ja an sich soweit (Internet, Sound). Will halt jetzt das System updaten von 10.13.6 (17G66) auf das aktuelle, damit ich alle HighSierra Updates implementiert habe, bevor ich für meine NVIDIA Grafikkarte die Web Driver installiere.

### macOS High Sierra

Version 10.13.6 (17G66)

iMac (27", Ende 2013)

Prozessor 3,2 GHz Intel Core i5

Speicher 16 GB 1333 MHz DDR3

Startvolume MacHouzer

Grafikkarte Display 7 MB

Sicherheitsupdate 2020-002 10.13.6 — Neustart erforderlich

Sicherheitsupdate 2020-002 wird allen Benutzern empfohlen und verbessert die Sicherheit von macOS.

UPDATEN

Weitere Informationen zum Sicherheitsinhalt dieses Updates sind erhältlich unter: <https://support.apple.com/kb/HT201222>.

Er lädt das Update auch herunter, doch beim installieren bricht er ab und folgender Screen erscheint:

```
Int __KERNEL_IS_WAITING_ON_EXTERNAL_CREDENTIAL_RESOLVER__(struct kauth_resolver_work *): kauth external resolver died while while waiting for work to complete
