

RadeonBoost.kext - Benchmark Scores wie am echten Mac / unter Windows

Beitrag von „vit9696“ vom 21. April 2020, 10:55

Falcon SMC firmware loading is available on X4000~X6000, but it might actually be unused in some(?) drivers. It is very easy to check by adding an OC patch `_TF_PhwsIslands_UploadFirmware → 0F 0B` for `AMDRadeonX****HWLibs.kext`. If the firmware is used, the system will not boot. Otherwise it will crash very early. Probably worth checking to be sure, which cards it affects.
