3 Jahre laufendes System mit Clover-Update "zerstört"

Beitrag von „grt“ vom 30. April 2020, 14:58

södele:

die rot eingekästelten sind doof, bzw. haben bis auf die AppleHDA dort nix zu suchen, wo sie gerade sind. die AppleHDA ist ein sonderfall, dass sie als unknown gelistet ist, zeigt, dass sie manipuliert wurde. da müssten wir eine nicht veränderte auftreiben. welches sierra hast du 10.12.x?

und die anderen eingekästelten räumst du mal in den /EFI/EFI/Clover/kexts/other ordner und löschst sie von dort, wo sie gerade liegen weg. dann reboot. du kannst das auch erstmal mit dem bootstick machen.

| Extension Name | Version | Last Modified | Loaded | Obtained from |
|------------------------------|-------------------------|-----------------|--------|---------------|
| AppleHDA | 279.48 | 08.09.16, 03:21 | Yes | Unknown |
