

# WhateverGreen - Fix für alle Grafikkarten (AMD/Intel & Nvidia)

Beitrag von „Noir0SX“ vom 4. Mai 2020, 15:47

## v1.3.9

- Added `igfxdumpdelay` boot argument to delay `-igfxdump` in ms
- Partially fix ICL framebuffer patching
- Add support to injecting `Force_Load_FalconSMUFW` from OpenCore
- Disabled automatic enabling of GVA for Polaris on 10.13 and lower
- Replaced `-radnogva` argument with `radgva=0/1` to force GVA for Polaris
- Added `wegtree=1` boot argument (`rebuild-device-tree` property) to force device renaming on Apple FW
