

Gigabyte Z390 DESIGNARE: OpenCore-EFI-Ordner und Anleitung

Beitrag von „teomi62“ vom 8. Mai 2020, 16:41

I would like to thank JimSalabim for your wonderful work, you have allowed me a clean installation of Catalina 10.15.14 with Z390 Designare, your configuration files and PDFs have allowed me after years of Clover, to use Opencore opening a new stimulating horizon of learning.

Thanks for all you do.

Teo

I would like to add that my integrated bluetooth module works 100% , if you are interested in step files....
