Hi elmacci, Thank you very much for your answer. I so envy those make there hackintosh with thunderbolt connection. At least the screen in the Alienware is not bad. So until I get a real MacBook I got to stick with this meanwhile. I don't like that APPLE sell there RAM and STORAGE so expensive, that was the reason for me to stick with my Alienware and apply hackintosh.

Thanks a lot! If you have any good news on ALIENWARE M15 R1 Hackintosh please let us know!
