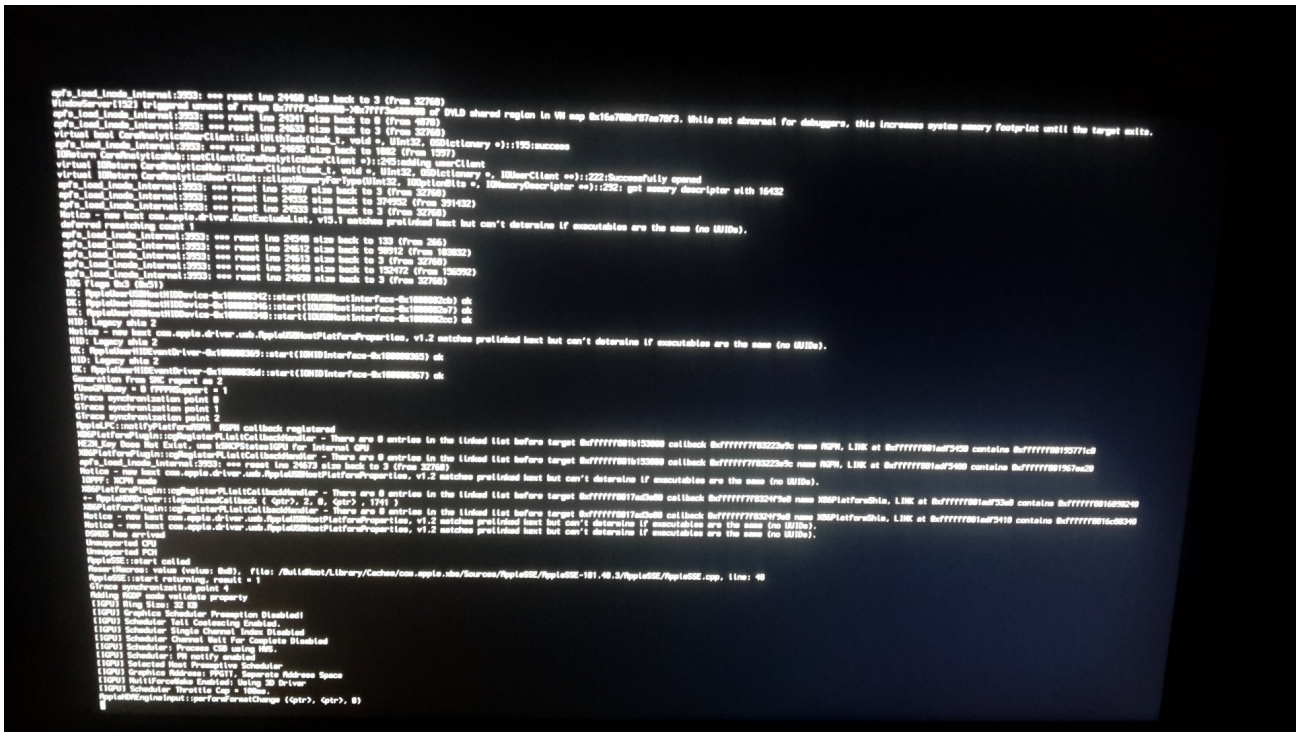
# In Arbeit Beelink U55 "Hack Mini" - inkl. EFI

### Beitrag von „cocoz“ vom 15. Mai 2020, 14:19

ok I redo and download the pack https://www.chinamobilemag.de/...u55-macos-hackintosh.html again and then post the results

update: i redo anythings you tell me i install catalita beta on ssd of u55 and launch and here there is scheenshoot:



after i press f11 by clover for nvram but the result is kernel panic in memory stack ...kext ect now i don't understand what is missing in my usb configuartion level you could kindly correct and reup may efi folder with what is missing please
