

Clover Configurator immer aktuell

Beitrag von „al6042“ vom 20. Mai 2020, 08:28

Hier mal wieder die aktuellere Version 5.13.01 mit folgenden Änderungen:

5.13.0.1

- NoDefaultProperties key in Devices properties in enabled by default (Clover Rev. 5117+)
- Fixed a bug of the latest update

5.13.0.0

- Disabled Drop OEM_DSM key in Acpi properties (Clover Rev. 5117+)
- Disabled KernelPm key in KernelAndKextPatches properties (Clover Rev. 5117+)
- Improvements

5.12.0.0

- This app is no longer compatible with Mavericks due to incompatible frameworks
 - Restored Vibrant Edition GUI
-
