

# OpenCore Sammelthread (Hilfe und Diskussion)

Beitrag von „al6042“ vom 23. Mai 2020, 17:53

Dann wird das wohl nix, laut Configuration.pdf:

## 12.1 Windows support

### Can I install Windows?

While no official Windows support is provided, 64-bit UEFI Windows installations (Windows 8 and above) prepared with Boot Camp are supposed to work. Third-party UEFI installations as well as systems partially supporting UEFI boot, like Windows 7, might work with some extra precautions. Things to keep in mind:

- MBR (Master Boot Record) installations are **not** supported.
- To install Windows, macOS, and OpenCore on the same drive you can specify Windows bootloader path (UEFI\Microsoft\Boot\bootmgfw.efi) in `EliaaOverride` section.
- All the modifications applied (to ACPI, NVRAM, SMBIOS, etc.) are supposed to be operating system agnostic, i.e. apply equally regardless of the OS booted. This enables Boot Camp software experience on Windows.
