

i9 10900k / Gigabyte Z490 Vision D - Er läuft

Beitrag von „SchmockLord“ vom 6. Juni 2020, 11:31

Servus zusammen,

ich hab jetzt auf meinem das Problem, was ich eigentlich mit jedem Hackintosh irgendwann mal hatte: Sleep/Wake Issues.

Ich hab eigentlich alles probiert, was mir einfällt:

- USB-Ports sind imho sauber konfiguriert
- darkwake=0
- TCPKEEPALIVE 0
- hibernatemode 0
- proximitywake 0
- powernap 0
- sleepimage gelöscht

Aber er wacht immer wieder aus dem Sleep auf.

Erst hatte ihn das tcpkeepalive immer wieder aufgeweckt. Dann hab ich es auf 0 gesetzt.

Jetzt wacht er mit dem Wake reason auf:

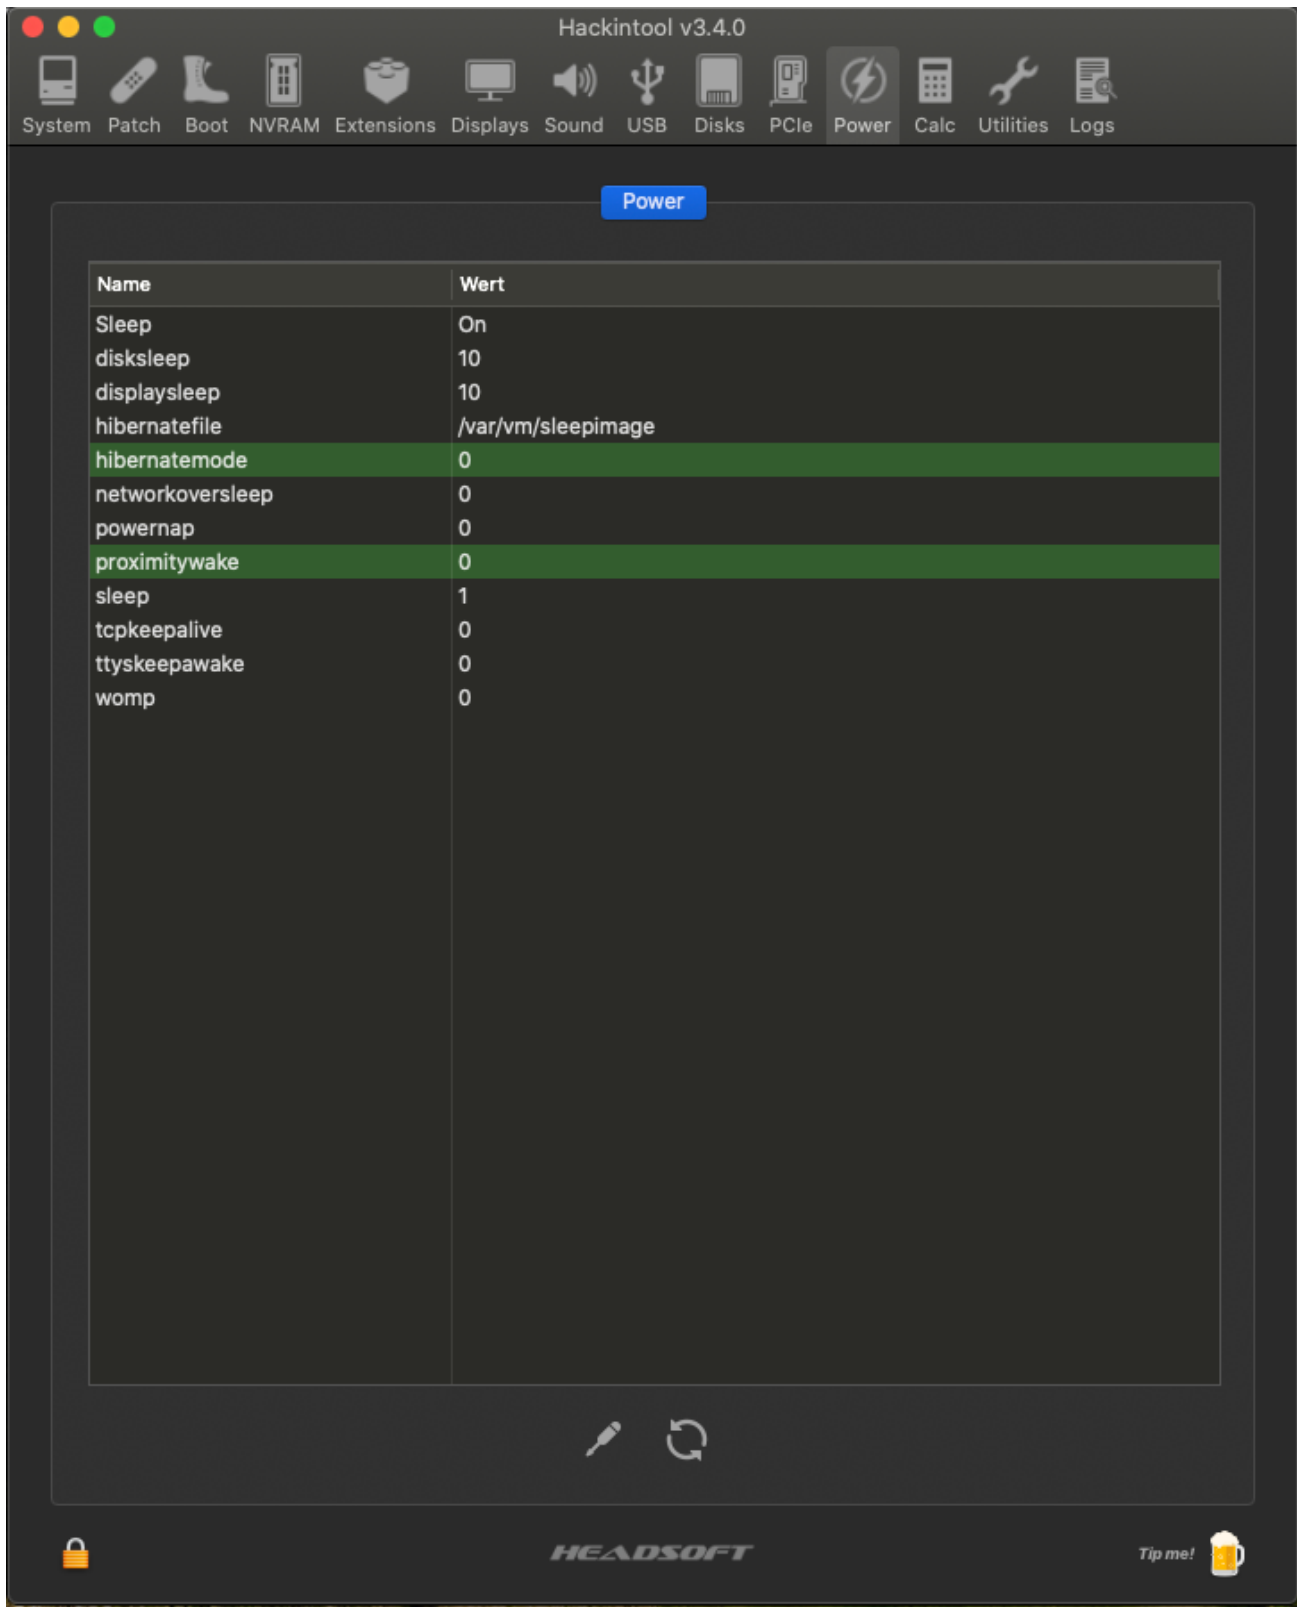

Wake from Normal Sleep [CDNVA] : due to XDCI CNVW PEG2 RP04/UserActivity Assertion Using AC (Charge:0%)

Im IORegistryExplorer hab ich aber überhaupt kein RP04.

Könnt ihr mir helfen?

Hier mal mein Log zu Sleep/Wake:
