# Gigabyte Aorus Z490 Elite AC - Brauche Hilfe mit iGPU

Beitrag von „joe2348235“ vom 11. Juni 2020, 23:03

[Zitat von dust26](#)

For the ALC1200, spoofing device id 48a30000 with layout id=1 works well for me, and I have the exactly same issue as you do with RTL8125, no solutions yet

Code

1. a348 Cannon Lake PCH cAVS

Makes sense, thanks for sharing! I've written to Mieze, the driver developer of Lucy RTL8125 on insanelymac, maybe she can make sense of my logs. I'll keep this thread (here) updated as well if there's any news. However, since this is a German forum, I'll probably write in German, but feel free to PM me 😊
