

Neues Hackbook ASUS ZenBook Pro UX550 4k mit I7 8750

Beitrag von „okram24“ vom 17. Juni 2020, 09:43

Hey [ktron](#) I used your EFI folder in my UX550GE and when trying to boot with Clover, my laptop would get stuck on the plus signs right before the verbose screen, if you understand. I am using Catalina though, is it a problem? Have you gotten it to work? Thank you!
