Aber doch nicht unter "Bless Override"?

Ja, so steht's in der Anleitung.

```
2. BlessOverride
Type: plist array
Description: Add custom scanning paths through bless model.
Designed to be filled with plist string entries containing absolute UEFI paths to customised bootloaders,
for example, \EFI\debian\grub64.efi for Debian bootloader. This allows unusual boot paths to be au-
tomatically discovered by the boot picker. Likewise they are equivalent to predefined blessed path, such
as \System/Library/CoreServices/boot.efi or \EFI\Microsoft\Boot\bootmgfw.efi, but unlike predefined
bless paths they have highest priority.
```
