

[Sammelthread] MacOS BigSur 11.0 DEV-Beta Erfahrungen

Beitrag von „mathewgx“ vom 16. Juli 2020, 12:32

[Zitat von Doctor Plagiat](#)

about a [tt] sudo [/ tt] before or you did something else wrong.

[user = '1665'] karacho [/ user] Yes, [SIP](#) is deactivated in the config (csr-active-config = 77080000), can be switched on again after the action.

Edit: A [tt] csrutil disable [/ tt] must be executed in the recovery.

Value 67000000 doesn't work anymore?
