

[Sammelthread] MacOS BigSur 11.0 DEV-Beta Erfahrungen

Beitrag von „Macko“ vom 16. Juli 2020, 12:45

I don't know if anyone has similar problems :

1. You cannot add a date to the Bar Clock Menu in the Date & Time settings
2. The iMac + Serial Number version is not displayed in About This Mac / in the Config via Clover is the notation /
3. TextEditor sometimes does not open a document. Until the second time

Current version Clover Configurator 5.14.1.0.

I enclose screenshots + EFI. Thanks to everyone for the help... 👍
