

[Sammelthread] MacOS BigSur 11.0 DEV-Beta Erfahrungen

Beitrag von „Macko“ vom 17. Juli 2020, 17:39

Hi, WIFI does not work on my PC. I replaced it USB WIFI TP-LINK TL-WN823N / the driver on the manufacturer's website from Catalina also works on Big Sur /.

The WIFI icon has been crossed out on the top panel since the Big Sur installation. /attached printscreen /

Please advice, can the icon be removed via a command?

Thank you for your advice ...
