Gigabyte GA-Z77X-UD3H/DSDT/KEXTE und mehr

Beitrag von „al6042“ vom 18. Juli 2020, 13:59

This MacIASL-DSDT-Patch is currently only available for the DSDT directly and should be part of the aforementioned patched DSDT for the board.

Do you have any USB-Devices in addition to keyboard and mouse running?

Then this might be the culprit, like mentioned in <https://www.reddit.com/r/hackintosh/>
