

[Sammelthread] MacOS BigSur 11.0 DEV-Beta Erfahrungen

Beitrag von „Macko“ vom 20. Juli 2020, 21:16

Hi, I installed Big Sur, then Windows 10. But the problem is that Clover Bir Sur refuses to install even after permission.

I can't do a common boot loader for Big Sur and Windows 10.

Do you know any instructions? Thanks for the help. 🤔👉
