Install Catalina on Lenovo Ideapad s145 i7-1065G7

Beitrag von „kesch" vom 23. Juli 2020, 19:40

Hey. Have you made it? I have the same laptop. I am thinking about buying a WiFi Card for it to use MacOS. But its quite expensive and I dont know if I am able to run MacOS on it.

On my PC with B450M, Ryzen3600 and Radeon RX5700XT I got MacOS Catalina running, but I would like to take it with me.
