Erledigt macOS Big Sur Opencore not working

Beitrag von „Macko" vom 24. Juli 2020, 19:23

In the old Clover, I could configure config.plist. I edited the icons in the GUI, disabled the display.

Now config.plist does not respond to modifications in the Clover Configurator.

How do I disable e.g. Recovery icon ??

After updating to Big Sur, the icon was renamed to Preboot. How do I rename it when I can't?
