

HP EliteBook 840 G1 & OpenCore Catalina/Big Sur

Beitrag von „sandoo“ vom 27. Juli 2020, 00:36

HP's EliteBook 840 G2 is primarily a Broadwell upgrade. HP has not modified anything apart from exchanging the processor. The Broadwell processor involves some improvements over the [precursor](#). The EliteBook 840 G2 consumes less power, has a lower operating noise and slightly lower temperatures, and lasts longer in our real-life battery tests. For the avoidance of doubt: The EliteBook 840 G1 did not score badly in any of the listed tests. The G1 and G2 model are otherwise identical.

Das EliteBook 840 g1 verfügt über maximal 13 Ports, das Limit liegt bei 15 Ports

Das BIOS erfordert immer Einstellungen

Ich habe es dem Baby angetan
