

OpenCore EFI Maker

Beitrag von „schmalen“ vom 1. August 2020, 09:58

Funktioniert eigentlich der "Maker" in Big Sur? Bei mir kommt ne Meldung das es Xcode nicht findet, obwohl installiert

```
Mac OS X
Mac OS X -> System EFI Maker (1.0.0)
What do you want to do next?
(1) Use OpenCore 0.6.0 0, iExu and plugins (beta version).
(2) Building and use beta version of OpenCore 0.6.0 1.
(3) Building and use beta version of OpenCore 0.6.0 1, iExu and plugins.
(4) Quit
Choose ? [ 2 ]
This function requires installation
(1) Install
(2) Download iExu tools
(3) None
(4) All-in-one
(5) All-in-one
